

Project Feature

Overview

An online platform for NEU students to share open job opportunities and information.

Use Case

Authentication

Authentication is the act of proving an assertion, such as the identity of a computer system user. We have authentication to control user login and out.

- Unauthenticated users can sign in
- Authenticated users can sign out

User Account

Each user can have an user account to login. The login uses Google Single Sign On.

- Log in with Google account
- Log out

Main Page

The main page will show a list of all blogs with a limit of 25.

- Sort posts by date
- Support list group for list of blogs
- Search content with company name keywords

Create New Post

We have a page to create/edit posts with its title, content etc.

- Add post title
- Add post content
- Select post job type
- Enter company name
- Choose feature image
- Upload image in the post content
- Add audio content
- Support text to audio

View Job Post

We have a detailed page to view the content of each post.

- Show the post title

- Show the publisher
- Show the publish date
- Show the post content
- Show the post company
- Show the post job type
- Show the default or uploaded feature image
- Delete/Edit a post if you are the author
